Thanks Harry. Deliberative Process/Ex. 5
What is a good time for you Wednesday?

Felicia Barnett, Director

Hi all!

This is the current data table along with the request. I suggest looking at 2-3 metals in surface water as a start say, Fe, Al and maybe zinc. Look at total and dissolved but maybe do dissolved first - might be clearer. We can look at other stuff later. I can talk tomorrow around 8 am or noon.

Distributional analysis and BTV calculation if possible; if differences detected, then trend analysis; n is kind of small though - guessing around 30-50 samples so far.

Thanks very much!

Harry - Here is the latest draft tech support form. Let me know what needs correction and I'll send it off.
(PS Check the EPA ID # too....not sure if it's right.) Mike
